SANDVIK BUSINESS PARTNER CODE OF CONDUCT
VERSION 1 , APPROVED IN 2015

Sandvik is committed to the fundamental principles on human rights, labor rights, the environment and the fight against corruption throughout our operations. This also includes building sustainable relationships with our Business Partners.

In our daily business and throughout our operations, we support the International Bill of Human Rights, the International Labour Organization's Declaration on Fundamental Principles and Rights at Work, the Rio Declaration on Environment and Development, and the United Nations Convention against Corruption as outlined in the ten principles of the United Nations Global Compact, in which we participate.

We have therefore developed this Business Partner Code of Conduct ("The Business Partner Code") and we require our Business Partners to make every effort to comply with it. MANAGEMENT SYSTEM

We encourage our Business Partners to strive towards continual improvement, and to establish, implement and maintain recognized management systems and standards related to the areas described in The Business Partner Code. Risk assessment, implemented policies, processes and routines, clearly communicated roles and responsibilities, relevant training and instructions, establishment and performance evaluation of measurable goals, along with functioning control systems, serve as the foundation for a successful implementation of The Business Partner Code.

MONITORING

All business relations between Sandvik and our Business Partners must be based on honesty, trust and cooperation. By accepting The Business Partner Code, the Business Partner commits to working proactively to meet these requirements within its own operations and supply chain. This should be achieved by cooperating in a transparent manner with Sandvik, for example by completing self-assessments and granting Sandvik personnel, or a third party of Sandvik's choice, access to relevant premises and information to conduct on-site audits, including permission to conduct interviews with employees and access to accurate and complete documentation and records related to The Business Partner Code. Any findings pertaining to the audit must be effectively remediated in a timely manner. We expect our Business Partners not to mislead us.

Violation of The Business Partner Code will cause negative impact on the business relation with Sandvik, including, but not limited to, the risk of contract termination.

It is the responsibility of the Business Partner to ensure that its sub-Business Partners comply with The Business Partner Code or comparable requirements. We require our Business Partners to evaluate and monitor their supply chain, and collect relevant information regarding the supply chain's compliance to be given to Sandvik upon request.

Sandvik treats all business and personal information received in a responsible manner and take measures to ensure that this information remains confidential.

We encourage our Business Partners to report violations of The Business Partner Code to Sandvik through our Speak Up system online, or by telephone. We encourage an active dialogue with our Business Partners on issues related to The Business Partner Code, or other questions concerning sustainability. We will do our utmost to respect and protect any person speaking up against violations of The Business Partner Code.
